

## Experience the SKF knowledge on October 13th 2015

Do you know what the impact of SKF bearings on our life is? It's huge! As the world leading supplier of bearings and units, seals, mechatronics, services and lubrication systems, we're setting standards every day. And we want to equip the world with our knowledge.

Especially for students of technical universities and HBO's we are organizing a SKF Experience Day, on Tuesday 13th October 2015.

During the day you will visit:

- the labs of SKF's global R&D center
- the test halls
- the SKF Solution Factory

### Challenging cases

To experience the way we work in SKF, to feel the atmosphere and culture, we invite you to work on a real SKF case, together with a team of other students and a dedicated SKF *Business Case advisor*.

At the end of the day you and your team will pitch the results to a professional jury. The winning team can step into a *Burton car* right away for another exciting experience!

Next to a meaningful program you will get a complete lunch and at the end of the day some drinks and snacks. The number of participants is maximized to 60 persons. So register now!

We like to meet you on Tuesday 13th of October.

Antonella Sabatini  
Corporate Recruiter SKF
